

Gas Detection

Service and Maintenance

Our Gas Detection Services

- Rental of portable and fixed gas detection
- Supply of tailored fixed gas detection systems
- Repair and maintenance of fixed and portable gas detection systems
- Gas detector calibration and certification
- On-site installation of detection systems
- On-site gas readings, performed by authorized gas testers
- Gas monitoring of confined spaces

Maersk H2S Safety Services detect the most common toxic and explosive gases encountered in the oil and gas industry, including H₂S, SO₂, CO, CO₂ and CH₄. To ensure that your gas detection equipment is reliable and functional, it is vital to perform periodic service and maintenance. Our workshop technicians are highly specialized within gas detection and authorized to perform service on portable and fixed gas detection systems.

MAERSK H2S SAFETY SERVICES IN SHORT
